## "Status Plus" a website for an educational center

**Objective:** The objective of this project is to develop and design a website that promotes an educational center. This site mainly going to be as a business website with the main information about the education center and contacts (links and numbers) but will also contain some experimental features.

**Features:** The website will have the following features:

**Course Submission:** This tab of website will present several courses to choose from and the user will be able to submit his/her information to get enrolled in the course. After he gives his info and comments, the operator is going to contact him/her about his enrollment and what timetable for chosen course they have.
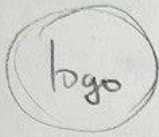

**Quiz:** The website is going to have an English, Math, Qazaq quizzes that user can try and get the result that will give him/her a level of knowledge and recommended courses.

**Sync with Instagram feed:** The website will contain a tab with the latest Instagram post.

**Language support:** The website will contain 2-3(English, Qazaq and Russian) language support.

**Design:** The design is going to consist of 5% red, 15%black, 30%gray, 60% white. I am going to use this website as reference.

**Conclusion:** "Status Plus" is a website for an educational center that will give the needed information and some extra features for user that interested in this educational center.
